

**In the Specification:**

Please replace the paragraph beginning at page 12, line 1, with the following:

--The preparation of antibodies exhibiting three specificities, so-called trispecific antibodies, which are also suitable to solve the problem underlying the present invention may be for example carried out by coupling to one of the IgG heavy chains of a bispecific antibody a third antigen binding site having an additional specificity, e.g. in the form of "single chain variable fragments" (scFv). The scFv may be coupled for example using a

-S-S(G<sub>4</sub>S)<sub>n</sub>D-I-linker (SEQ ID NO:1)

to one of the heavy chains (S = serine, G = glycine, D = aspartate, I = isoleucine).--

Please insert the accompanying paper copy of the Sequence Listing, page number 1, at the end of the application.

**REMARKS**

Applicants request entry of this amendment in adherence with 37 C.F.R. §§1.821 to 1.825. This amendment is accompanied by a floppy disk containing the above named sequences, SEQ ID NO:1, in computer readable form, and a paper copy of the sequence information which has been printed from the floppy disk.

The information contained in the computer readable disk was prepared through the use of the software program "PatentIn" and is identical to that of the paper copy. This amendment contains no new matter.

Attached hereto is a marked-up version of the changes made to the Specification by the current Amendment. The attached pages are captioned "**VERSION WITH MARKINGS TO SHOW CHANGES MADE.**"
